

## UPS Case Study

### Economic Solutions to Growth

---

When constructing their largest parcel distribution hub in Europe, UPS required a large number of highly reliable, top quality vehicle loaders. The problem was the budget. With such a large number required, costs had to be kept to a minimum without compromising on quality or functionality.

### The Sovex Solution

---

Sovex provided the perfect solution with their range of fully refurbished telescopic conveyors. A total of 42 were installed in the UPS hub at Tamworth and have performed as new, enabling UPS to reach their challenging growth target.

Sovex refurbished machines are renovated to the same high specifications as our new ones. All refurbished conveyors are fitted with a new belt, new rollers, bearings, electrical wiring and fully reconditioned motors. The machines are then resprayed in the client's colour of choice. Sovex Quality Control Team test every machine before release to ensure they meet Sovex high standards. All refurbished conveyors come with a full 12 month warranty.
